DESCRIPTION

A cat is floating in zero gravity and nobody knows how it got there. Upon inspection, the cat seems to have smuggled Earth's secrets. We asked him nicely to hand them over. He blinked. The file is called `pls_dont_look_at_image.png` for a reason. You know what to do.

HINTS

- He didn't move a whisker, just his least significant bits.
- When he finally talked, it was all space.
- The last layer came padded for a soft landing.
