

InfoSec SIG @ KJSSE

FLAG OF THE DAY

FOTD # 7

The Debug Door

CATEGORY	Web Exploitation, Broken Access Control
DIFFICULTY	Easy
DATE	23/09/2026
FLAG FORMAT	INFOSEC_SIG{ . . . }
PAGE	header . php

DESCRIPTION

Mission Control's access portal has a debug door someone forgot to close. The page says ACCESS DENIED, but a backup clearance code is still hiding nearby. Find it, decode it, and send it the right way to get through.

HINTS

- The browser shows a page. Its source shows a little more.
- Thirteen letters forward can undo the scramble.
- The door listens for an X-Clearance-Level request header.
